

the **impact** of a water filter

"Since receiving the filter from Habitat for Humanity Guatemala, we don't have stomach pains anymore. And we don't have to boil our water, which saves us time."

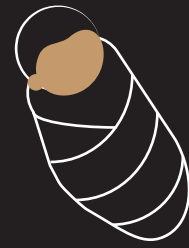

-Odily Aquino de Xoc

challenge

95%

of water is contaminated in Guatemala

40%

of infant mortality is caused by waterborne illnesses

impact

5,566

the number of water filters that have been distributed by Habitat Guatemala to date

18

the number of liters that a water filter can hold and filter at a time

99.99%

of the time, a filter will eliminate traces of cholera, salmonella, E.Coli, and fecal chloroform from contaminated water sources

how to get involved
